Question 1: 15 year old child with knee pain.

What is the finding? What other organ systems may be affected?

Answer 1 : metaphyseal lucent band;

this can be seen with leukemia, lymphoma, non-specific illnesses; other causes (not common in this age group) include Neuroblastoma mets, congenital syphilis, Rubella and

Practically any other organs or system can be affected in the given differential diagnosis.

Other clinical features such as bone pain in other areas, sternal tenderness, nodal enlargement, hepato splenomegaly to be checked for.
